OFFICE ACTION

1. **This application has been assigned to Technology Center 1700, Art Unit 1797 and the following will apply for this application:**

Please direct all written correspondence with the correct application serial number for this application to **Art Unit 1797**.

Telephone inquiries regarding this application should be directed to the Electronic Business Center (EBC) at <http://www.uspto.gov/ebc/index.html> or 1-866-217-9197 or to the Examiner at (571) 272-1139. All official facsimiles should be transmitted to the centralized fax receiving number 571-273-8300.

Election/Restriction Requirement

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- **Group I, claims 1-3 and 5-12, drawn to a mixing apparatus with a single pneumatic source.**
- **Group II, claims 13-15, drawn to a spherical mixing vessel.**

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 1797

Group I is distinguished from the prior art by further revealing as special technical features the inclusion of a single pneumatic source for both pressurizing the mixing vessel and to drive a jet pump comprising the batch loader. The special technical features of Group I, as defined in Rule 13(2) PCT therefore are: - Mixing apparatus with single pneumatic source to charge and discharge the mixing vessel.

Group II is distinguished from the prior art by further revealing as special technical features the mixing vessel being spherical. The special technical features of Group II, as defined in Rule 13(2) PCT therefore are: Spherical mixing vessel.

The special technical features of Groups I and II are neither common nor the same or corresponding and solve different problems. Consequently the requirements of Unity of Invention (Rule 13(2) PCT) are not fulfilled.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1797

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
